

Javita is coffee evolved.

We wake up to it, do business over it and relax with it over a good meal to the tune of more than two billion cups worldwide each day. Tall or short, hot or cold, with cream & sugar or simply black, there's no denying the power of a great-tasting cup of coffee. It gives you energy, helps you think and can keep you alert. It can also be good for you.

Created by coffee lovers for coffee lovers, Javita understands what you want (and expect) from your coffee, which is why ours offers you MORE energy, alertness and mental clarity, we've infused medicinal herbs (*Bacopa monnieri*, *gotu kola* and *green tea*), so it doesn't just taste great, it's also great for you.

Based on Asian Ayurvedic medicine, these herbs have been used for thousands of years to improve mental clarity (*Bacopa monnieri*), to enhance memory development, learning and concentration (*gotu kola*) and to increase energy, suppress appetite and improve mental processes (*green tea*).*

Our Coffee (energy + mind)

We start with estate-grown South American Arabica and Robusta coffee beans, picked at the peak of ripeness, expertly blended and slow roasted to preserve the delicate flavors and aromas. With the roasting complete, the beans are finely ground and processed to the top mixing and solubility standards for a premium instant coffee. Our coffee is then blended with a proprietary mix of "energy + mind" herbs and packaged in individual serving stick packs! It has taken us a long time to perfect this process, and the smooth, rich flavors, delicate notes and freshness will prove it! All you have to do is add water to enjoy the perfect cup of coffee – *instant satisfaction!*
